

Hajee Mohammad Danesh Science and Technology University, Dinajpur
Department of Computer Science and Engineering
M.Sc. in Computer Science and Engineering
Course Code: **CSE 501**, Course Title: **Computer Arithmetic**

List of Assignments

[Instruction: All assignments must be handwritten and submitted by each student prior to the commencement of semester final examinations. Furthermore, students are required to include a unique example for each assignment topic.]

1. Robertson division algorithm and its application with a prime number example.
2. Digit-by-Digit square root of an unsigned binary number with algorithm and example.
3. Importance of logarithmic arithmetic for cryptographic computations with an example.
4. Chen's convergence computation for a numerical sequence example with numerical verification.
